Re: Review of Submitted Map, Nephi Sandstone Corporation, Nephi Gypsum Mine, M/023/011,  
Juab County, Utah

Dear Mr. Evans:

The Division received your map and letter on December 18, 1997 and have performed a review to determine if we can use the information submitted to complete our files and check our bonding calculations. On the map you have identified various features which were highlighted by red arrows. A red line was drawn around the quarry area; we assume that this is what you consider the extent of quarry disturbance.

We are returning the map to you in order to have you identify the amount of disturbance. This could be accomplished by shading or encircling the areas associated with each of the roads, stockpiles, storage, and work areas disturbed by mining and are currently being used. You could complete this task much in the same way you encircled the quarry. Roads could be highlighted and an approximated width and length given. Also, please provide a total disturbed acreage figure for all disturbance.

Please complete this task by the end of January, it will greatly help us in expediting our review. If you have any questions regarding this letter please call Tony Gallegos at 538-5267 or me at 538-5321.

Sincerely,

Tom Munson  
Senior Reclamation Specialist
